DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114 was filed in this application after appeal to the Board of Patent Appeals and Interferences, but prior to a decision on the appeal. Since this application is eligible for continued examination under 37 CFR 1.114 and the fee set forth in 37 CFR 1.17(e) has been timely paid, the appeal has been withdrawn pursuant to 37 CFR 1.114 and prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 12/4/03 has been entered. Claims 22-26 are pending in the application.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 22-26 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. A transparent conductive layer is critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). Based on the instant disclosure, particularly Comparative Example 1, it is noted that a conductive layer 2 between the transparent substrate and the hardcoat layer is essential to the invention though the amended claims do not include the transparent conductive layer 2.

Response to Arguments

4. Applicant's arguments with respect to claims 22-26 have been considered but are moot in view of the new ground(s) of rejection.
